LONESTAR INTEGRITY TECHNOLOGIES

MODULAR TOOL SYSTEM

ONE CONNECTION. EVERY ATTACHMENT.

A VERSATILE, LOCKING INTERCHANGE SYSTEM

At the heart of every Lonestar Integrity Technologies tool is our innovative locking quick-connect system. This universal connection design allows extension poles, pull tabs, and specialized attachments to seamlessly interchange, creating a fully modular system built for versatility.

The quick-change locking mechanism allows operators to easily extend their reach, switch attachments, and adapt their equipment to different tasks while maintaining a secure mechanical connection during operation. One connection system. Countless configurations.
