

3P SERVICES

PIPELINE INSPECTION SERVICES

ILI Solutions
You Can Trust

PROTECT PEOPLE AND PLANET

WHAT DRIVES 3P?

For over 30 years, 3P Services has been driven by a clear purpose: to Protect People and Planet. This commitment continues to guide our success today. Our In-Line Inspection services are engineered to ensure the **safety and integrity of pipelines** - protecting the environment and the communities that rely on it.

As a **high-tech partner to pipeline operators worldwide**, we combine precision, data-driven expertise and a strong sense of responsibility. Our promise is simple: safety, quality and lasting impact - achieved through continuous innovation, excellent service and true teamwork. This approach shapes how we develop our technologies, collaborate with our customers and achieve reliable results, even in the most challenging environments.

Sustainability has always been a core principle for 3P Services. In more than 30 years, our ownership has never changed - ensuring continuity, stability and zero business disruption for our clients. We are an international team, and we believe this diversity fosters the innovative thinking that sets us apart. Our goal is to continue supporting our customers for the next 30 years and beyond by staying true to our mission:
protecting people and the planet.

WHY CHOOSE 3P?

30+ Years of ILI experience

With decades of hands-on experience across multiple industries, we have a proven track record in delivering high-quality pipeline inspection services.

Enhanced Customer Services

Our dedicated customer service team provides comprehensive support throughout the entire project, ensuring smooth communication and quick responses to your needs.

Conventional & Challenging Lines

We offer bespoke inspection services that are tailored to each client's specific requirements, ensuring that even the most complex needs are met with precision.

Sustainable Partnership

Our goal is to build lasting, trust-based partnerships with our clients. We believe in transparency, sustainability, and delivering value over the long term.

PROTECT PEOPLE AND PLANET

CONVENTIONAL LINES

Fast. Reliable. Proven.

Our tool fleet for conventional lines is optimized for short lead times, operational safety and cost efficiency.

Key Facts & Benefits

- High First Run Success Rate
- Short project durations from planning to reporting
- Cost-efficient thanks to proven tool configurations
- Extensive experience in conventional lines
- Reliable data quality and comparability

Tool Fleet Portfolio

- Available from 3"
- Available technologies: MFL, UT, GEO, XYZ
- Optimized for typical conventional pipeline designs
- Fast mobilization and proven robustness

CHALLENGING LINES

Customized. Targeted. Efficient.

Some pipelines require more than standard solutions. Based on our 30+ years of ILI experience, we develop customized inspection tools

- ranging from 2"-48"
- designed for safe and efficient inspection
- adapted to challenging conditions

Special Solutions

- High/Low Flow
- Bi-Directional
- Coatings & Clads
- High Temperature
- Heavy Wall
- Small Diameter
- Multi Diameter
- High/Low Pressure
- Special Media
- Baseline Survey
- Non-metallic Pipes
- Turnkey Projects
- Pigging Valves

3P delivers the right inspection strategy for every pipeline configuration.

3P TECHNOLOGIES

Our experts detect defects and anomalies early, before they become costly problems.
Pipelines are exposed to various metal loss threats, such as different forms of corrosion, as well as geometric anomalies like dents or ovalities. Long-term assessment is key to identifying changes over time and enabling timely intervention. This proactive approach helps maintain pipeline integrity and safety in the long run.

MFL

Our MFL tools provide accurate detection and sizing of internal and external metal loss, with no metal-to-metal contact and no brushes to minimize pipeline wear. They offer exceptional sensitivity, especially for pinhole detection, and deliver high-resolution data optimized for heavy-wall inspections. All tools are available from 2".

UT

Our high-end UT sensors ensure accurate measurement of both internal and external surfaces. They are suitable for small and large diameter pipelines, heavy-wall thickness, and harsh operating conditions. Available from 3".

GEO

Our GEO tools deliver precise data on the length, width, shape, and depth of pipeline deformations, even in high-speed pipelines. Tools with a low mechanical passage value are suitable for both new and existing pipelines, as well as for pipelines undergoing cleaning.

XYZ

XYZ Inspection delivers high-precision mapping of pipeline routes using Inertial Measurement Units (IMUs) to track exact horizontal and vertical positions, enabling accurate geographic localization of all key features. It provides highly accurate position data (+/- 1 m horizontally), even in high-speed pipelines. Available from 3".

3P-X

We go the eXtra mile for you.

In addition to established ILI technologies like MFL, GEO, UT, and XYZ, 3P Services has developed exclusive in-house technologies under the **3P-X umbrella**.

Unique technologies, such as

- DMR (Direct Magnetic Response)
- SRD (Short Range Distance)
- NEO
- EC (Eddy Current)
- and others

offer unique detection and identification capabilities, adding significant value for our customers. Based on advanced sensor configurations, 3P-X technologies are tailored to the specific needs of each project.

Applications

3P-X technologies can be used for heavy wall gas pipelines, ultra-high-resolution internal metal loss inspections, coating inspections, glass fiber reinforced plastic pipeline and other applications.

MEDIA CENTER

Stay up to date with 3P Services

Our Media Center offers comprehensive information on 3P Services and our pipeline inspection projects – from selected case studies and in-depth technical papers to brochures and videos about our company and technologies.

Discover how technology, know-how and experience come together in close collaboration with our customers to ensure safe and sustainable pipeline operation.

Learn more about project challenges, inspection concepts and performance – all in one place.

CERTIFICATION

- ISO 9001:2015 - Quality Management System
- ISO 45001:2023 - Health, Safety, Environment
- ATEX
- API Standard: ILI PQ Level 1-3
- VdTÜV - MB ROHR 1069
- CyberVadis Silver Certification

CONTACT

Stay in touch. We are looking forward to supporting you with your questions, pipeline projects and challenges.
