

Construction Management and Inspection Services

Precision oversight. Field accountability. Projects delivered right.

Pipeline construction projects demand strict compliance, rapid deployment of qualified inspectors and tight coordination to hold schedule and ensure operational readiness. Paxon meets these demands with a nationwide network of certified inspectors and managers. We deploy fast without losing quality. We onboard teams through a proven process, enforce rigorous QA/QC, and work with client leads to meet regulatory requirements, hold schedule and turn over safe, compliant assets on day one.

What we deliver

Construction management, oversight

Experienced construction managers who help ensure projects are built to specification and industry codes and standards.

Inspection coverage

All classifications of inspectors for distribution, pipelines, facilities, tanks, and plants.

Qualified, certified inspectors

CWI, API, AMPP/NACE, ASME, utility, specialty, and safety and environmental inspectors for projects.

Intelligent Field Engineering

Field data capture, cloud load and action, and digital workpack, accurate data at the source, fewer return trips, faster closeout.

How we differentiate

Customer service

Engagement and alignment before, during, and after the project — we stay connected and accountable throughout the full program lifecycle.

Intelligent sourcing

Our database is paired with a precise matching process for inspectors — enabling an accelerated onboarding process and reduced mobilization.

Experienced internal team

Our customers interact with professionals who understand their needs and can lead inspector teams.

Operator-focused model

We collaborate to define inspection scope, risks, and resource needs with client-specific criteria to target our inspector network.

CASE STUDY: OHIO

Inspectors help gas pipeline operator mitigate delays, hit marks

The client needed an inspection program for gas transmission and distribution projects to ensure compliance with company, state, and federal regulations. Paxon onboarded more than 45 credentialed inspectors within 30 days. Since 2022, the program has operated with a \$25 million annual budget, achieved a 20% diversity spend, and maintained zero lost days and zero recordable incidents.

45 staff deployed | \$25M budget | 0 lost days

CASE STUDY: INDIANA

120+ inspectors deployed to execute program for gas system operator

A major gas utility needed rapid onboarding of inspection and construction management personnel across multiple locations. Paxon onboarded 120 inspectors within 30 days — spanning chief, welding, corrosion, and safety disciplines — while delivering structured scheduling, QA/QC oversight, and contractor qualification with zero lost days and zero recordable incidents.
