18,000-Gallon Weir Tank

18,400-Gallon Double Wall Tank

17,600-Gallon Mix Tank

Mini Frac Tank

Double Wall Mini Frac Tank

6,300-Gallon Chemical Tank

CERTIFIED CLEAN

Prior to delivery, each of our tanks is cleaned and tested to assure that levels of any substances previously stored in the tanks are below defined limits. E-Tank's limits are based on nationally recognized environmental and health standards. This practice minimizes the possibility of cross-contamination from other industrial and environmental worksites. One occurrence of cross-contamination at a worksite can be very costly in terms of time, money, and reputation.

COMPLETE MAINTENANCE

Each item in our inventory is in top condition. Every time a piece of equipment is returned to our yard, it is subjected to a rigorous inspection procedure and a thorough maintenance program. Exteriors are cleaned, valves are actuated, coatings and seals are inspected, paint is maintained, and moving parts are lubricated. Serviceability and appearance are important. Our equipment functions as it should and presents a good appearance at our customers' worksites.
