

Tuboscope™

Custom Coating

Protecting Assets. Enhancing Performance. Extending Service Life

Tuboscope's Tube Kote™ (TK™) Coatings set the industry standard for protecting tubulars and accessories against corrosion and wear, reducing deposits, and enhancing hydraulic efficiency. Recognized by major operators worldwide, they deliver proven protection and performance in demanding environments.

When customers choose TK-Coatings, they don't just gain the performance of the coating itself—they benefit from our consistent application, strict process control, and rigorous inspection standards that deliver proven reliability in the field.

Applied at our coating facilities around the world, these coatings cover all commonly used oilfield tubular goods (OCTG) and accessories. In addition to our proprietary TK line, we also offer and apply alternative coating materials to meet your specific application needs.

Proper coating selection and a comprehensive corrosion control program are essential to the safety and performance of drilling, production, and pipeline operations.

For enhanced performance and asset reliability, custom accessories should be coated when used with internally coated tubulars, creating a continuous barrier for optimal protection.

Benefits

- Corrosion protection
- Chemical resistance
- Wear resistance
- Mitigates deposit formation
- Improves hydraulic efficiency

The full line of proprietary coatings is engineered to perform under a wide range of conditions—including downhole temperatures up to 400°F (204°C) and environments with high H₂S and CO₂ concentrations.

Custom Coating Locations

City	State / Territory	Country
Houston	Texas	United States
Odessa	Texas	United States
Houma	Louisiana	United States
Abu Dhabi	—	United Arab Emirates
Dammam	—	Saudi Arabia
Edmonton	AB	Canada
Gladbeck	—	Germany
Veracruz	Veracruz	Mexico

Custom Coating Capabilities Include

- Pup joints
- Mandrels
- Gas lift mandrels
- Packers
- Valves
- T's and elbows
- Manifolds
- Flanges
- Spools
- Couplings
- Thru-Kote™ sleeves
- Pump bodies
- Pump impeller
- Heat exchanger components
- BOP components & hardware
- Other custom coating variations

External coatings are available

Products We Apply

- Tube-Kote™ (TK™) Coatings
- Tubo-Wrap™
- Electroless nickel plating
- Xylan®
- Molykote®
- Molydag®
- Ever-Slik®
- Phosphate Coating
- Teflon®
- Other coating materials available

For accurate coating selection and coating material options please contact your local Tuboscope representative.
