TRAXALL

X-Series Programmable Multi-frequency Transmitters

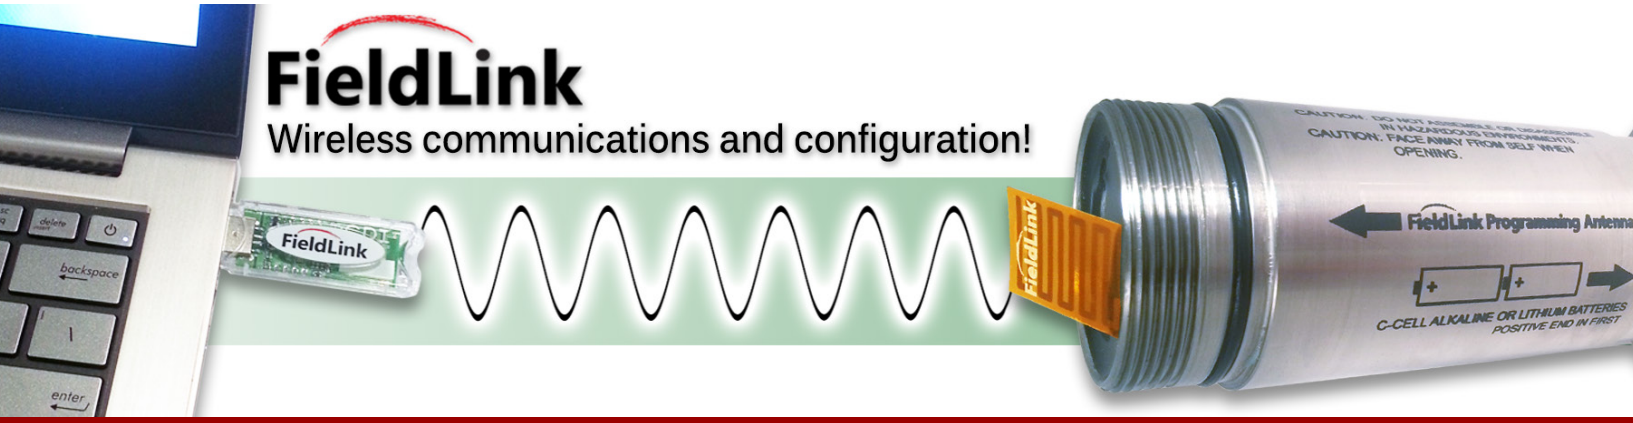

CDI X-SERIES TRANSMITTERS are TRAXALL-compatible electromagnetic pipeline pig-tracking devices offering both programmable frequency and power control through CDI's proprietary FieldLink wireless communications system.

Frequency Control allows the operator to configure the transmitter to one of TRAXALL's seven colorized frequencies, or the 22 Hz legacy frequency for backward compatibility with CDI's CD42 receiver or competitive receivers.

Power Control allows the operator to directly manage a trade-off between transmitter range vs. battery life. For example, you can set output power to maximum for short runs/long range, or reduce output power for long runs/long battery life.

FieldLink is CDI's proprietary wireless communications network. Each X-Series transmitter comes with a built-in radio frequency antenna. By connecting a supplied radio frequency USB key, any Windows PC or laptop can be used to configure a transmitter.

TRAXALL

X-Series Programmable Multi-frequency Transmitters

1 YEAR WARRANTY

Specifications

- Pipeline sizes: 2 in. [50.8 mm] and larger
- Operating Temp: -40°F to 140°F [-40°C to 60°C]
- Operating Pressure: 2,500 psi [172 bar]
- Material: 304 Stainless Steel*

Options

- Titanium construction
- ATEX-IECEx certification
- Pressure and ripcord activation

Standard Features

- Programmable frequency
- Pulse or continuous transmission
- Available for rent or purchase
- Alkaline N, C, or D-cell batteries
- Knurled & threaded caps
- One-year warranty
- Spare O-rings

** Also available in Titanium (some models)*

The TRAXALL family of transmitters is covered under United States Patent No. 9172406
