

Pioneering responsible solutions to complex earth science challenges

bgcengineering.ca

Who we are

BGC Engineering Inc. (BGC) is an international consulting firm that provides professional services in applied earth sciences.

Founded in 1990, we provide specialized expertise to address a broad spectrum of complex engineering and geoscience challenges. From scoping level studies to detailed design, construction supervision to independent third-party reviews, BGC offers a full range of earth science consulting services.

Over 800 professional engineers, geoscientists, technicians, software professionals and support staff across 17 offices in North and South America, the Caribbean and Australia work in collaboration with our clients to pioneer responsible solutions to complex earth sciences challenges. BGC operates as one team with a focus on connection between our people, sectors, disciplines, and offices across the globe to provide clients with innovative, common-sense solutions partnered with exceptional service.

OUR GEOTECHNICAL ASSET MANAGEMENT SOLUTION

Developed by BGC, Cambio™ supports asset and risk management via a systematic and proactive approach towards identifying, evaluating, and managing geotechnical challenges. Cambio's key features include data visualization, field workflow automation using a mobile application, algorithms to prioritize geohazards, real-time monitoring, and remote sensing analysis and visualization. In 2024, **Cambio Earth Systems** launched as an independent company focused on accelerating the adoption of Cambio across the industry.

OUR TECHNICAL EXPERTISE

CAD	Geohazard Assessment & Management	Remote Sensing
Climate Change	Geophysics	Rock Mechanics
Cold Region Engineering	GIS	Software Development
Data Science & Machine Learning	Groundwater	Soil Mechanics
Engineering Geology	Instrumentation	Surface Water
Geochemistry	Laboratory	3D Data Visualization

SECTORS WE SERVE

- Mining
- Pipelines
- Transportation
- Communities
- Energy

HOW TO REACH US

Our global team of experts are here to provide you with sound advice and solutions to your unique earth sciences challenges.
