

INTEGRITY & CORROSION

PROTECTING ASSETS FOR STAKEHOLDERS & THE ENVIRONMENT

At MIS, our Integrity & Corrosion Services division helps operators safeguard critical pipeline assets while meeting strict compliance requirements. With experienced AMPP-certified technicians and deep field knowledge, we offer end-to-end support—from advanced electrical surveys to full-scale project execution.

External Corrosion Support

- + Specialized electrical surveys: Annual, CIS, DCVG, ACVG & more
- + Full data analysis and survey review
- + Pipeline issue identification & remediation recommendations
- + Cathodic protection facility design & installation
- + Atmospheric corrosion inspections
- + Leak detection surveys
- + Regulatory audit prep & compliance support

Construction Integrity Services

- + Turnkey execution for ECDA programs, ILI digs & pipeline recoats
- + Asset integrity focus with safety-first project delivery
- + On-time, on-budget performance from a reliable partner
- + AC Mitigation Installation

Internal Corrosion Support

- + Maintenance pigging interval consulting
- + Field crews for pigging operations
- + Chemical program oversight & optimization
- + Data-driven internal corrosion strategy

Integrity Engineering & Management

- + Reassessment interval calculations, dig prioritization & threat modeling
- + Tool selection, risk ranking, and project management
- + Support for your Integrity Management Plan (IMP)
- + AC mitigation field data collection and design

LET'S PROTECT WHAT MATTERS, TOGETHER.

Partner with a team that understands your assets, your goals, and the stakes. Whether you're facing corrosion challenges, need turnkey project execution, or require expert regulatory support, MIS is here to deliver with precision, integrity, and proven performance.

THE **MIS** STORY MIDSTREAM INTEGRITY SERVICES

Founded in 2015 as a PHMSA-compliant control room, Midstream Integrity Services (MIS) has grown into a trusted partner for midstream operators across the U.S. What began as a single control room operation has expanded into a full suite of services – including Integrity & Corrosion, Leak Detection, Compliance, Measurement, Field Automation, Fiber Optics, and more.

Backed by a team of experienced professionals, MIS delivers customized, high-quality solutions with one goal: protecting your assets with the same care and commitment we'd give our own.
