

# Reliable Reputation. Responsive Service.

## Our Services

### Conventional NDT

- Radiographic Testing (RT)
  - Film Radiography
  - Computerized Radiography (CR)
  - Digital Radiography/Real Time (DR)
  - Profile Radiography
- Magnetic Particle Testing (MT)
- Dye Penetrant Testing (PT)
- Ultrasonic Thickness Testing (UTT)
- Visual Testing (VT)

### Advanced NDT

- Pipeline Integrity – Full Direct Assessment (PLI)
- 3D Laser Mapping of External Corrosion & Dent Evaluations
- Internal Corrosion Mapping – Automated Ultrasonics
- Positive Material Identification with (OES)
- Pulse Eddy Current Testing – A screening tool that occurs through insulation to identifies material loss.
- Ultrasonic Testing (UT)
  - Phased Array (PAUT)
  - Phased Array + FMC/TFM
  - Time of Flight Diffraction (TOFD
- Material Verification Testing – MMT (Strength, Hardness, Ductility)

## Who We Are

JANX is a **leading** nondestructive testing (NDT) and inspection solutions provider with offices throughout the United States. For **over 40 years**, JANX has executed NDT inspection services through advanced technology and the expertise of a **dedicated, highly-trained workforce**.

Our team comprises **of technical professionals** who work tirelessly to ensure pipelines, energy and structural assets are safe for people, property, and the environment.

## Why JANX?

### Dedicated and Experienced Personnel

Knowledgeable technicians and team leaders with extensive understanding of our customers' needs and the industries we serve.

### Prompt and Efficient Service

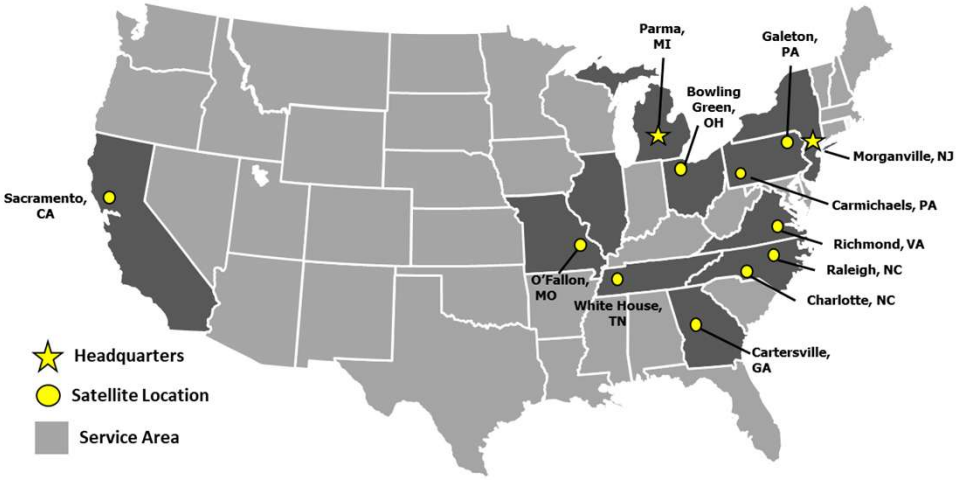

We have the capacity to staff up quickly—we report to work sites within 24 to 48 hours of service calls, often in less time.

### Cutting Edge Evaluation Methods

Conventional and cutting-edge evaluation methods, including the use of proprietary and highly advanced technologies.

## Our Nationwide Presence

## Industries Served

- **Mainline Pipelines**
- **Distribution Lines**
- **Gathering Lines**
- **Refineries**
- **Power Plants**
- **Compressor, Meter, & Pumping Stations**
- **Bridges**
- **Processing Plants & Facilities**
- **Fabricated Parts & Components of Any Scale**
- **Cranes**
- **Structural**

## Our Commitment to Safety

JANX partners with our HSE department to mitigate injury risks for employees, the public, and the environment. We achieve this through initiatives aligned with state and federal regulations, as well as customer-specific requirements. Notable proactive measures we employ include:

- **Safety Observations**
- **Job Safety Analyses (JSA's)**
- **Supervision Focus Safety Audits**
- **Committee Meetings**
- **Safety Metric Tracking**
- **HSE and Radiological Professional Audits**
- **Near-Miss and Good-Catch Programs**
- **Employee Safety Recognition**
- **Vehicle Inspections**

## Quality, Training, and Certification

- JANX's exceptional compliance team, composed of Level III auditors strategically deployed across operational areas, sets industry standards, showcasing our commitment to quality.
- Our highly trained and certified workforce facilitates the provision of diverse NDT services to clients.
- JANX actively participates and upholds positive standings in multiple Operator Qualification programs, broadening our ability to serve a diverse clientele.
