

NONDESTRUCTIVE EXAMINATION YOUR PIPELINE'S FIRST LINE OF DEFENSE

A good NDE program starts with a solid plan so that the right technique is used for the right defect and location – reducing false positives/negatives. Our team will work with your team to develop a plan that prioritizes the safety, cost, and accuracy of your NDE program.

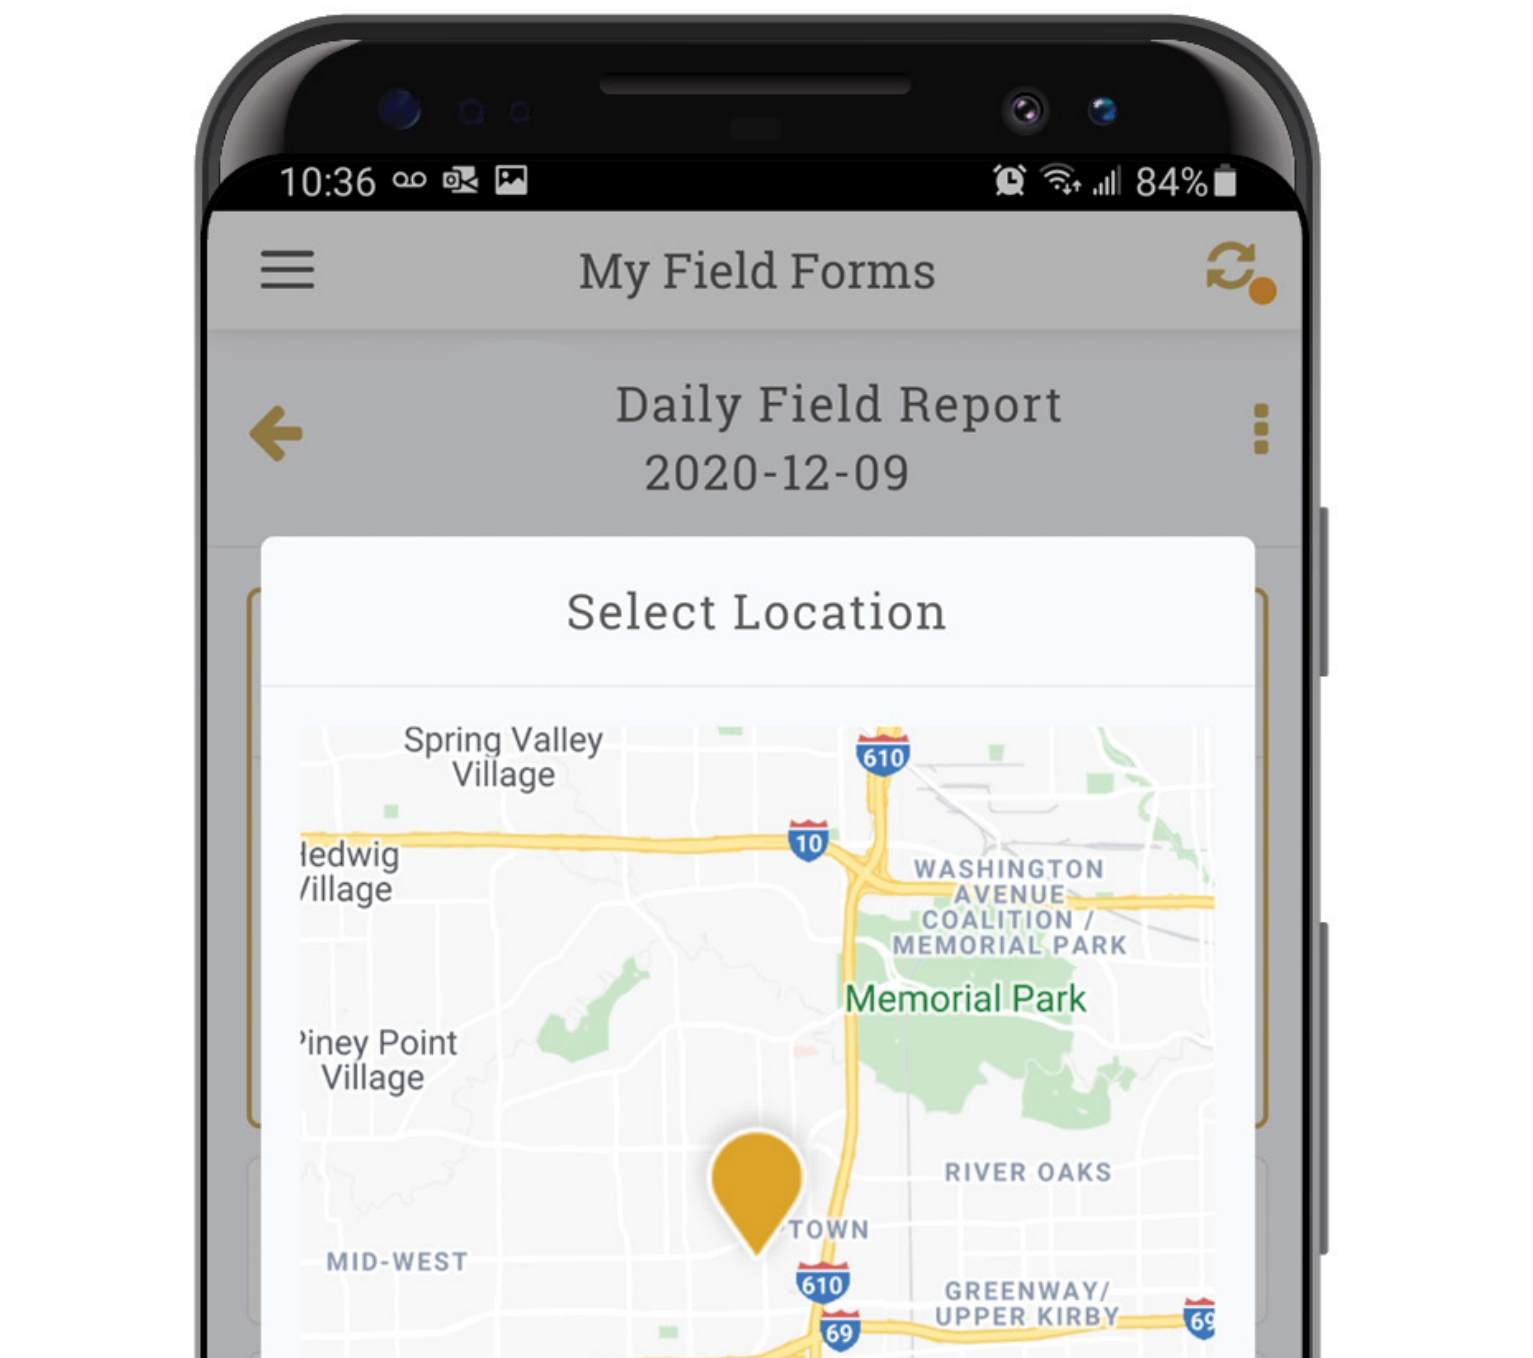

TECHNIQUES WE CAN UTILIZE ON YOUR PROJECT

Ultrasonic Straight Bean and Shear Wave (UT)	Materials Verification
Phased Array Ultrasonics (PAUT)	Hardness Testing
TFM/FMC Ultrasonics	Grinding and Etching
ToFD (Time of Flight Delay)	Microbiologically influences Corrosion (MIC) Testing
Automated Ultrasound (AUT CScan)	p/s (Potentiodynamic/Static) Potential Testing
Creaform Laser Scanning	pH Testing
Magnetic Particle Testing (MT)	Soil and Water Collection
Liquid Penetrant Testing (PT)	Resistivity Coating Inspection
Eddy Current (ET) Schark and Spyne	
Pulse Eddy Current	

A MODERN NDE EXPERIENCE

Pipeline Portal allows secure, online access to your NDE program. This innovative tool provides the information needed to execute your project safely, and efficiently. The portal includes:

- Form Based Data Entry
- Online Procedures
- GIS Locating
- Automated Reporting
