

Unlock the potential of your critical earth science data

Cambio is the earth science cloud platform for critical infrastructure management.

Cambio enhances infrastructure management decisions, ensuring they are transparent, cost-effective, well-documented, defensible, and easily communicated to both regulators and senior management.

Transform your geotechnical data management

- ✓ Complete and diverse earth science data sources integrated, in context.
- ✓ Powerful, automated insights, monitoring, and alerts.
- ✓ Dashboards for at-a-glance situational awareness.
- ✓ Workflow-driven to share data, track progress and make quick informed decisions.

Current industry challenges

- 01** Increasing regulatory oversight and standards requirements.
- 02** Rapidly changing environment with more extreme events.
- 03** More and more data, requiring better, faster insight.
- 04** Growing need for visualization and sharing of data, in context.

Designed by engineers.
For engineers.

100+

Clients across critical infrastructure sectors

20,000+

Client layers in Cambio™

500,000+

Kilometres of pipeline and transportation assets

20+

Years of geotechnical data management experience

100,000+

Kilometers of lidar change detection across sectors

10+

Mining deployments using Cambio™

440,000+

Inspections stored in Cambio™
