COMMUNICATIONS SERVICES

KEY SERVICES

Fiber Network

Middle and Last Mile RF Solutions

Off-Grid Power Solutions

Network Monitoring

SEAMLESS, SECURE AND RELIABLE

Reliable communication is crucial for successful pipeline operations. Our communications services deliver robust, secure solutions to keep your team connected and informed, ensuring seamless operations across all areas.

MIS provides turnkey wireless network projects, including design, engineering, project management, tower construction, RF network deployment, FCC licensing, and IT networking solutions. Once the network is live, our team provides continuous monitoring, maintenance, and ongoing support to ensure maximum uptime and security.

CONNECTIVITY FOR PIPELINE OPERATIONS

LET'S PROTECT WHAT MATTERS, TOGETHER.

Partner with a team that understands your assets, your goals, and the stakes. Whether you're facing corrosion challenges, need turnkey project execution, or require expert regulatory support, MIS is here to deliver with precision, integrity, and proven performance.

THE **MIS** STORY

MIDSTREAM INTEGRITY SERVICES

Founded in 2015 as a PHMSA-compliant control room, Midstream Integrity Services (MIS) has grown into a trusted partner for midstream operators across the U.S. What began as a single control room operation has expanded into a full suite of services – including Integrity & Corrosion, Leak Detection, Compliance, Measurement, Field Automation, Fiber Optics, and more.

Backed by a team of experienced professionals, MIS delivers customized, high-quality solutions with one goal: protecting your assets with the same care and commitment we'd give our own.
