

Delivering Reliable **Nitrogen Solutions** for Critical Applications

Who We Are

Global Nitrogen Services (GNS) specializes in delivering efficient & reliable Nitrogen service solutions for the Oil & Gas, Mining, Refining, Shipping, and Industrial Process Industries. Backed by Generon's industry-leading membrane technology and manufacturing excellence, we provide innovative systems and unparalleled customer support.

01 Expertise You Can Trust

With thousands of Generon-built units operating globally and countless successful jobs completed safely by GNS, we deliver unmatched reliability and performance.

02 Responsive Support

24/7/365 availability with highly skilled operators ensuring operational safety.

03 Cost-Effective Solutions

Minimized downtime and logistics costs with on-site Nitrogen generation.

Key Offerings

Nitrogen Services

- ✓ Pressurizing/Pressure Testing
- ✓ Purging (hot or cold)
- ✓ Drying & Inerting
- ✓ Leak Testing
- ✓ Pipeline Purging & Pigging
- ✓ Nitrogen Cooling
- ✓ Plant Shutdowns (turnarounds)
- ✓ Mine Seal Inerting
- ✓ Enhanced Oil Recovery
- ✓ Well Completions
- ✓ Underbalanced Drilling
- ✓ Gas Lifting
- ✓ Degassing
- ✓ Offshore Support

Customizable Equipment Rentals

- ✓ Air Compressors
- ✓ Boosters
- ✓ Air Foam Units
- ✓ Membrane Nitrogen Generators
- ✓ Liquid Nitrogen Pumpers
- ✓ Truck and Trailer-Mounted High Pressure Nitrogen Systems
- ✓ Desiccant Dryers

Let us partner with you to deliver innovative Nitrogen solutions that maximize efficiency and reduce costs!

Texas: 16250 Tomball Parkway, Houston, TX 77086

Colorado: 2525 Riverside Pkwy. Grand Junction, CO 81501

GNS Advantages

- ✓ Modular, mobile units for rapid deployment and efficiency.
- ✓ GNS is one of the largest independent Nitrogen membrane generator service companies in the World. We can support your project needs with our large fleet of compressors, membrane units, boosters, and Nitrogen pumps.
- ✓ The most advanced Nitrogen Membrane technology where Nitrogen can be generated onsite at Nitrogen purities up to 99%.

Key Features

- ✓ High Flow Rates – N2 pumpers that can deliver up to 10,000 SCFM with a single unit.
- ✓ High Pressures – N2 pumpers that can deliver pressures up to 10,000 PSIG and N2 membrane packages that can deliver up to 5,000 PSIG.
- ✓ Custom manufactured packages for long term, permanent installations.
- ✓ DNV2.7-1 rated equipment for Offshore Use.
- ✓ ATEX/Zone 2 Hazardous Area compliant Nitrogen membrane systems.

Customer-Focused Services

Reduced downtime with on-site Nitrogen generation.

Comprehensive support from job design to execution.

Tailored solutions for each industry and application.

Let us partner with you to deliver innovative Nitrogen solutions that maximize efficiency and reduce costs!
