

Buried Asset Locating & Mapping

Ensuring Safety and Efficiency Through Precision Underground Asset Locating

Leveraging decades of experience and industry-leading technology, Arnold accurately locates, identifies, and documents your underground infrastructure. Our cloud-based platform offers real-time GIS data access, precise mapping, and advanced asset management—ensuring seamless oversight of your underground utilities, pipelines, and subsurface assets.

Subsurface Asset Scanning/Locating and GPR Services

Arnold utilizes advanced Ground Penetrating Radar (GPR) to achieve unmatched and utility scanning services. Our state-of-the-art technology precisely detects subsurface utilities, delivering comprehensive data to mitigate risks, prevent costly delays, and enhance project efficiency. Whether for preconstruction planning or active site management, our scanning solutions provide the clarity and confidence needed to move forward with certainty.

Investigation & Mapping Services

We provide comprehensive Subsurface Utility Engineering (SUE) and geospatial mapping solutions tailored for the midstream and downstream industries. Our services enhance pipeline routing, facility planning, and infrastructure development—ensuring safety, regulatory compliance, and operational efficiency. By delivering precise subsurface data, we help mitigate risks, prevent costly delays, and support asset integrity management for long-term reliability.

Data exchange, processing & collection made easy

Arnold's customers enjoy unlimited access to their data anytime, anywhere—via phone, tablet, or computer—through our cloud-based platform. This technology precisely captures as-built data in real-time, ensuring seamless updates to geospatially referenced GIS and CAD files. Easily view, locate, and integrate data from office to field and back. With permanent digital records, you can confidently reference and stake back to your data whenever needed.

Seamless Asset Management

Unlock instant access to your project's utility data with Arnold's real-time portal. From live field updates to comprehensive digital records, our platform keeps your utility information organized, accessible, and actionable. Streamline workflows, enhance collaboration, and make informed decisions with confidence—anytime, anywhere.

RTK Corrections

Your trusted RTK corrections provider for precision positioning—when and where you need it.
