About INPIPE PRODUCTS™

INPIPE PRODUCTS™ has been at the forefront of the pipeline pigging industry for over 40 years, delivering innovative solutions for pipeline pigging, isolation, testing and SMART inspection across the oil & gas, energy, water and processing industries.

Based in the North East of England, with a service centre in Aberdeen, we support clients globally through engineering expertise, in-house manufacturing and testing capability, and specialist operational services.

Our success is underpinned by ongoing investment in research and development, resulting in patented technologies that have become industry standards. From our first patented pig signaller in 1986 to today's advanced SMART Pigging technologies, we continue to enhance pipeline performance, safety and asset integrity for clients worldwide.

Company Profile

Why Us

Built on over 40 years of pipeline pigging expertise, **INPIPE PRODUCTS™** combines engineering capability, innovation and operational experience to deliver reliable project solutions.

- **Expert Design & Engineering:** Supported by in-house manufacturing and full-scale testing capability, we deliver bespoke turnkey solutions for complex pipeline project requirements.
- **Innovative Solutions:** Our dedicated team of pigging specialists provides clients with cutting-edge solutions tailored to their specific requirements.
- **SMART Pigging Technology:** Advanced inspection technologies provide enhanced insight into pipeline condition, supporting flow assurance and asset integrity.
- **Comprehensive Support:** Our flexible integrated approach supports project delivery from concept through to operation, providing bespoke turnkey solutions tailored to client requirements.
- **Extensive Hire Fleet:** One of the industry's largest fleets of pipeline isolation, testing and pig tracking equipment, available 24/7 with rapid mobilisation worldwide.
- **Efficient Logistics:** Established global logistics capability ensures fast mobilisation, customs clearance and reliable delivery to site..
- **ISO Accreditations:** Certified to ISO 9001, ISO 45001 and ISO 14001, supporting quality, occupational health & safety, and environmental management.

iNPIPE PRODUCTS

40 YEARS 1984-2024

Global leaders in pipeline pigging, maintenance, isolation and testing solutions.

www.inpipeproducts.com

1984

FOUNDED

Established in 1984 by Ken Hemingway, a lifelong pipeline industry expert.

1986

FIRST PATENT

The first patented product, an omni-directional intrusive signalling, remains a global market leader.

2000

DUAL TOOL

Developed for Operators and Contractors to provide a double block and bleed barrier for welding. Can also be used to hydrotest new welds.

2006

FLEXIBLE ISOLATION DUAL TOOL

Moving forward upon client request the flexible Dual Tool was developed to traverse complex pipeline configurations.

2017

CLASS 10K INTRUSIVE PIG SIGNALLER & JACKING DEVICE

Introduced the API 10K signalling design and fully tested jacking device for safe removal under full line pressure.

2017

FIRST OF ITS KIND 90" PIGGING SOLUTION

Designed, manufactured and tested a 90" integrated inlet cleaning system for one of the world's largest seawater pipelines

2014

WET BUCKLE PIG INSERTION TOOL

Developed for an international pipe laying company for a major offshore project.

2013

MBO & RELOCATION

Management buyout by the current team. Relocated to a new 60,000 ft² facility with state-of-the-art features.

2018

HEALTH & SAFETY SILVER RISING TO GOLD AWARD WINNERS

Winners of the RoSPA Occupational Health and Safety Awards from 2018 to 2024, the longest-running industry awards scheme in the UK.

2018

350km 36" & 48" PIGGABLE PLUG

Developed a new piggable/welding pig design using our uniquely patented tyre design, providing proven reliability.

2020

ICE PIGGING

Completed the first ice pigging contract for an onshore condensate pipeline decommissioning project in the UK.

2023

ACOUSTEK™ PIPELINE BLOCKAGE & LEAKAGE DETECTION

Introduced acoustic reflectometry technology to detect full or partial blockages in gas pipelines or valve leakage.

2022

ABERDEEN SERVICE CENTRE Opened a new facility providing engineering support & pigging maintenance services

2021

CRAWLER PIG JETTING SYSTEM

Introduced a non-abrasive, environmentally friendly solution for cleaning pipelines using a self-propelling water jet cleaning pig.

2020

SUPER DUPLEX PIGGING SYSTEM, CAMERA PIG & OFFSHORE RECEIVING SYSTEM

Designed, built and tested systems with ongoing technical support and maintenance.

2024

WATER INDUSTRY AWARDS WINNERS

Ground-breaker Award for our SMART Pigging technology, commissioned in partnership with Above Utilities for a 42" UK aqueduct project. This world-first innovative pipeline cleaning method saves millions of litres of water.

2024

NON-INTRUSIVE PIG SIGNALLER

Introduced Mag-Trax (Magnetic Pig Signaller) and Sonic-Trax (Acoustic Pig Signaller) for pipeline pig/scrapper detection.

2024

PHOENIX SMART PIGGING SOLUTIONS

Debris Mapping Pigs/Tools developed from decades of experience provide a 360° internal assessment of pipelines using state-of-the-art sensor technology.

Company Profile

Our Business Areas

End-to-end pigging capability across products, hire, services, engineered solutions and SMART inspection technologies.

Pigging Products

We design and manufacture a comprehensive range of tools for pipeline pigging, maintenance, isolation and hydrostatic testing, supported by SMART inspection technologies.

Pipeline Pigs	Isolation Tools	Pig Handling	Pig Tracking & Signalling	Pigging Ancillaries	SMART Pigging
• Anti-Static • Articulated • Bi-Directional • Crawler Jetting • Cup & Conical Cup • Dual & Multi Diameter • FLEXICAST™ • Foam & Foam Disc • Gauging • Gels & Specialty • High-Friction • Hybrid FLEXICAST™ • Jetting Bypass • Magnetic • Pull-Through • Smart Gauge • Spheres • Studded / Pin-Wheel	• Abandonment Plugs • Dual Tool Isolation • High-Pressure Plugs • Hyperbaric Plugs • Internal & Flange Weld Testers • Low / Medium Pressure Plugs • Multi-Tool Isolation • Valve Removal • Welding Pigs/Piggable Plug	• Automatic Pig Launcher • Pig Launchers & Receivers • Pig Handling Equipment (Pigging Poles, Sphere Lifter, Loading Cassettes & Pig Trolleys) • Portable Pig Launchers • Sphere Release Finger • Sphere lifting equipment • Wet Buckle Pig Insertion Tool	• Intrusive Signallers • Magnetic Signallers (Non-Intrusive) • Acoustic Signallers (Non-Intrusive) • Tracking Systems • EM & Acoustic Transmitters	• Pig Diverter • Sphere Flow & Barred Tees	• PHOENIX Debris Mapping Tool • Camera-Integrated Pig • Acoustek™ Pipeline Blockage & Leakage Detection

Pigging Services

Our specialist team provides operational pigging services supporting pipeline cleaning, inspection, isolation, testing and commissioning across a wide range of applications.

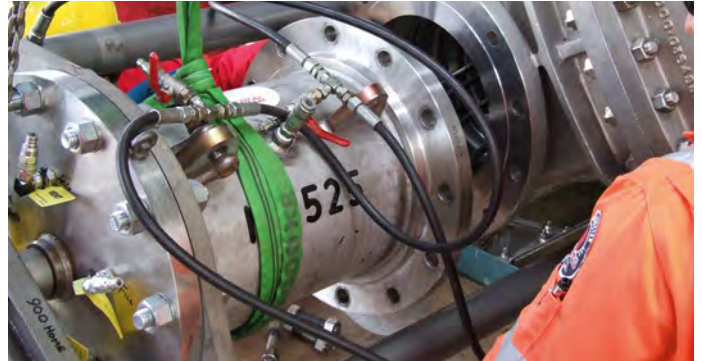

- Pipeline cleaning and pigging operations, including ice pigging
- Pig fleet management
- Pigging strategy development
- On-site operational support
- Stuck pig location and recovery support
- Pipeline blockage and leakage detection
- Client training and technical support

Hire/Rental

Our Hire & Rental division provides rapid access to a comprehensive fleet of fully tested and certified isolation, testing and tracking equipment.

- Short and long term hire options
- 24/7 availability with rapid mobilisation
- Global logistics and customs support
- On-site technical assistance

Solutions

Our solutions team provides engineering-led consultancy and project delivery, integrating products, hire equipment, services and SMART Pigging technologies into fully engineered project solutions.

- Engineering consultancy and feasibility studies
- Project management and execution
- Custom tool and system design
- Pipeline pig testing and validation
- ILI client support and tool verification
- Assurance-based pipeline cleaning programmes

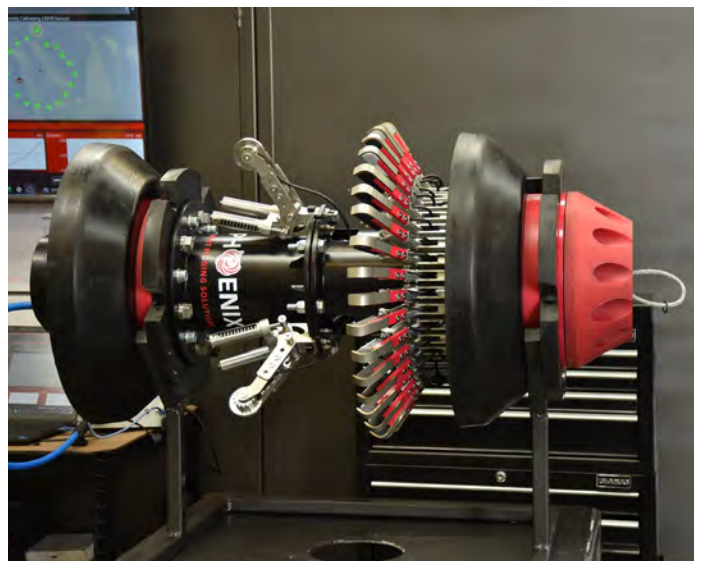

SMART Pigging

Our SMART Pigging capability provides advanced insight into internal pipeline condition, cleanliness and integrity using specialist inspection technologies.

- PHOENIX Debris Mapping Tools – 360° internal assessment of pipeline condition using advanced sensor technology
- Camera-Integrated Pig – internal visual inspection using integrated video and LED lighting
- Acoustek™ System – acoustic reflectometry for detection of blockages, obstructions and valve leakage

SMART Pigging technologies are deployed through service-led inspections or integrated within fully engineered project solutions.

Company Profile

What Our Clients Say

INPIPE PRODUCTS™ strives to provide exceptional products, services and innovative solutions to its clients.

We value what our customers think of our products and services and are proud of our average rating of 9/10, which indicates that customers value what we do for them.

This is an independent two-way evaluation tool providing verification of the various functions within the business and provides an average snapshot of how these functions are perceived by our clients worldwide.

Company Facilities and Capabilities

iNPIPE PRODUCTS™ is headquartered in North Yorkshire, England, on a 6-acre (261,360 ft²) site featuring a 60,000 ft² facility with state-of-the-art infrastructure. Our facilities include CNC machining, polyurethane moulding and foam moulding cells, along with comprehensive testing capability, enabling a fully integrated manufacturing process.

Our purpose-built test facility supports proof of concept and factory acceptance testing (FAT), including third-party inspection and client-witnessed procedures. Systems from 6" to 90" are validated through internationally recognised independent authorities.

Our Aberdeen Service Centre provides engineering support and pigging services from the heart of the UK's oil and gas sector, supporting projects worldwide. The facility includes a fully equipped workshop for pigging assessment, pig fleet management, trials, refurbishment and maintenance activities.

The Aberdeen facility also provides dedicated hydrotesting capability and a comprehensive range of hire tools for pipeline isolation and testing, with rapid turnaround and global mobilisation support. The centre also supports the delivery of engineered solutions and SMART Pigging technologies across a range of project applications.

Our design and engineering capabilities are driven by a team of industry specialists with extensive knowledge and experience. Supported by in-house manufacturing and testing, we deliver innovative, efficient and high-quality solutions to clients worldwide.

Company Profile

Global Reach

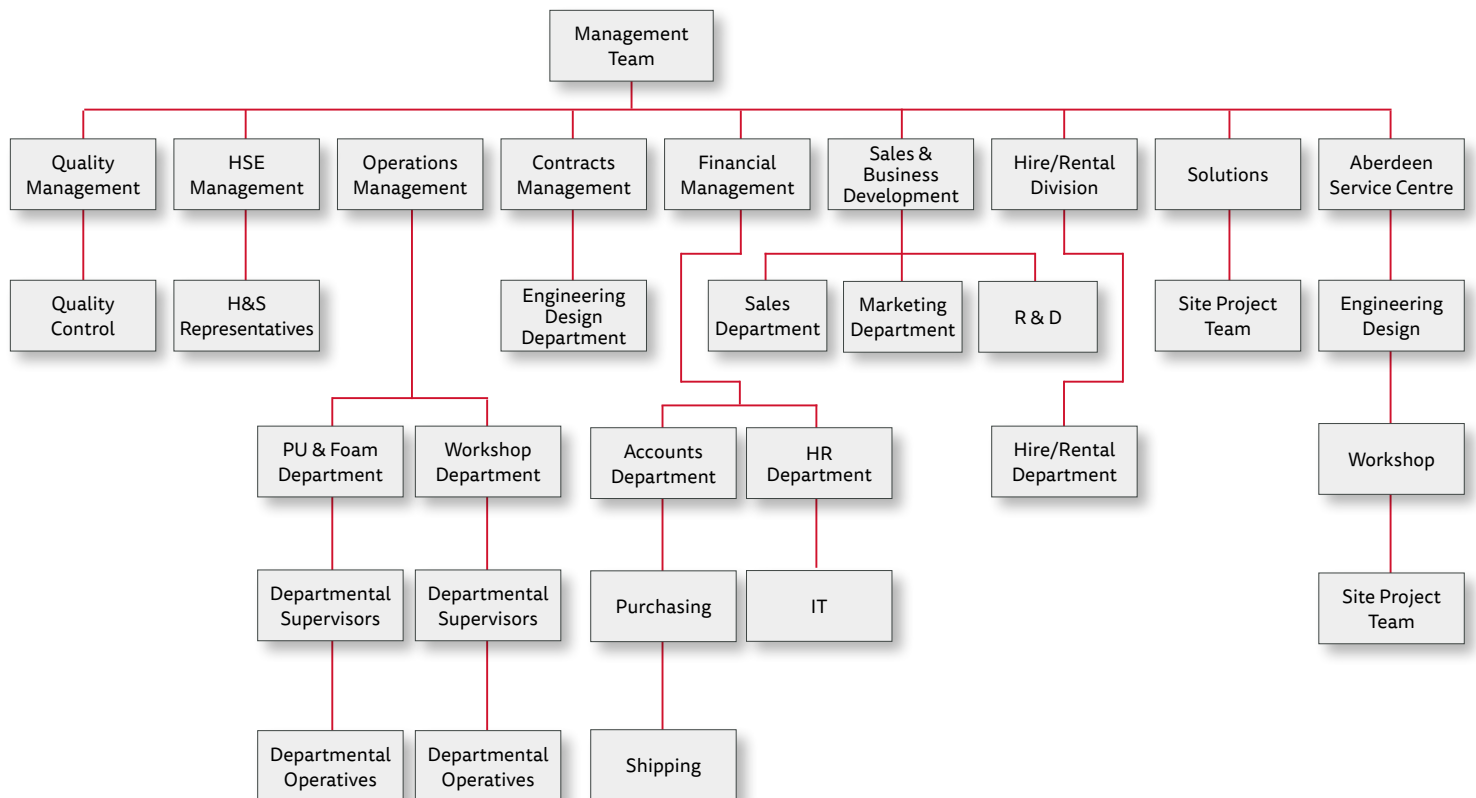

iNPIPE PRODUCTS™ operates globally with multi-cultural customers and product users. An inherent flexible and responsive approach, together with open communication has led to the development of valued commercial relationships between **iNPIPE PRODUCTS™** and Clients around the world.

With a strong partnership of alliances globally, the company is responsive and supportive.

The map below is indicative of the areas in which we operate:

Our Organisation

Company Profile

QHSE

INPIPE PRODUCTS™ operates an integrated management system certified to ISO 9001, ISO 14001 and ISO 45001, supporting quality, environmental responsibility and occupational health and safety across our operations.

Health and Safety Awards

INPIPE PRODUCTS™ operates an integrated management system certified to ISO 9001, ISO 14001 and ISO 45001, supporting quality, environmental responsibility and occupational health and safety across our operations.

Company Profile

Our Policies

At **INPIPE PRODUCTS™**, our policies embody our unwavering commitment to responsible and ethical business practices. We strive to maintain the highest standards across all aspects of our operations, ensuring that our actions align with our core values and industry regulations.

Key Policies Include:

Corporate Social Responsibility: Our CSR initiatives are designed to positively impact the communities we serve, emphasising sustainability, ethical practices, and contributions to social well-being.

Business Privacy Policy: we are committed to protecting the privacy and security of our clients, partners and employees. Our Business Privacy Policy outlines how we collect, use, store and protect personal and business information.

Anti-Bribery Policy: We enforce strict measures to prevent and combat bribery and corruption, ensuring transparency and integrity in all our business dealings.

Anti-Slavery Policy: Our commitment to eradicating modern slavery is reflected in our rigorous protocols that ensure fair labor practices and the protection of human rights within our supply chain.

Equality, Diversity & Inclusion: We are dedicated to fostering a diverse and inclusive work environment where every employee is valued and given equal opportunities, promoting a culture of respect and fairness.

Ethical Procurement: Our procurement processes are guided by ethical principles, ensuring that all our suppliers and partners adhere to high standards of conduct and sustainability.

Contractors Policy: We maintain clear guidelines for managing contractors, ensuring that they meet our standards for safety, quality, and compliance while delivering exceptional service.

Quality Policy: Our quality management system is focused on delivering products and services that consistently meet or exceed customer expectations, ensuring continuous improvement and excellence.

Health & Safety Policy: We prioritise the health and safety of our employees, contractors, and visitors by adhering to stringent safety protocols and fostering a safe working environment.

Environmental Policy: Our environmental practices aim to minimise our ecological footprint through sustainable operations, resource efficiency, and proactive measures to protect the environment.

SMART PIGGING SOLUTIONS

SOLUTIONS DRIVEN	ADVANCED CAPABILITIES	DELIVERY
At iNPIPE PRODUCTS™, we specialise in pipeline pigging, isolation, testing and SMART inspection solutions. With extensive engineering experience and integrated in-house manufacturing and testing capability, we deliver custom-designed turnkey solutions for complex pipeline project requirements. Our engineering expertise and reliability have established a strong reputation among major operators and contractors worldwide.	iNPIPE PRODUCTS™ operates advanced design, manufacturing and testing facilities to ensure the highest quality standards. Proof of concept and factory acceptance testing (FAT), including third-party inspection and client-witnessed procedures, can be undertaken for pigging products and engineered solutions. Systems from ½" to 90" are validated through internationally recognised independent authorities. Specialist training in pipeline pigging, isolation and testing is delivered at our HQ, Aberdeen Service Centre or at client sites.	Our HQ and Aberdeen Service Centre ensure effective project coordination and timely delivery worldwide. With significant logistics expertise, we ensure equipment is shipped efficiently, cleared through customs and delivered to client sites globally. Our right-first-time approach is underpinned by over 40 years of experience delivering pigging products and engineered solutions worldwide.

Bespoke by design, proven in operation
