PRECISION MACHINING

Dan-Loc delivers precision machining solutions for complex fasteners and custom components used in the energy, transportation, Industrial & Construction, military, and aerospace industries. Our experienced machinists produce high-performance parts from carbon and alloy steels, stainless steels, Inconel™, Monel™, and other exotic alloys, meeting exacting dimensional and performance requirements.
With CNC lathes and 4-axis milling centers, we manufacture components up to 6 inches in diameter and 60 inches in length, achieving close tolerances and superior finishes, even on the most challenging materials and designs.

QUALITY ASSURANCE

Every part we produce is backed by a rigorous inspection and testing process to ensure precision, reliability, and consistency.
Our in-house quality capabilities include:

- Coordinate Measuring Machine (CMM) Inspection
- Positive Material Identification (PMI)
- Magnetic Particle Inspection (Mag Particle)
- Hardness Testing
- Tensile and Yield Testing
- Charpy Impact Testing
- Ultrasonic Testing (UT)

Dan-Loc maintains ISO 9001 and API Q1 certifications, as well as API 20E BSL Levels 1, 2, & 3 and API 20F BSL Levels 2 & 3 qualifications.

These certifications ensure full compliance with the most demanding industry standards for quality, material traceability, and manufacturing integrity
