ULTRASONIC WELD INSPECTION

Inspect weld quality and integrity with ultrasonic scanning configurations.

RADIX

Weld-focused UT scanner

- Modular weld inspection platform
- Flexible manual or automated configuration
- Probe positioning for weld coverage
- Field-ready setup for UT workflows

CLIX-WI

Chain scanner for weld inspection

- Chain-based weld inspection configuration
- Supports ultrasonic weld inspection on pipe
- Modular chain sections for pipe range flexibility
- Stable alignment for repeatable scanning

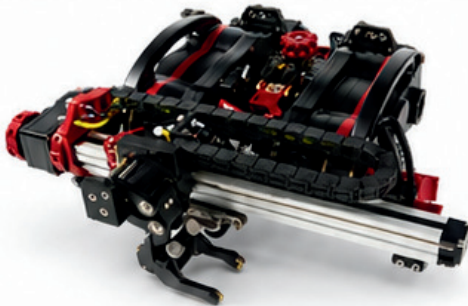

APEX

Modular UT scanner

- Modular universal scanner platform
- Supports weld, corrosion, tank, and B-scan applications
- Tool-free adjustments for fast setup
- Flexible probe positioning for coverage

CORROSION MAPPING

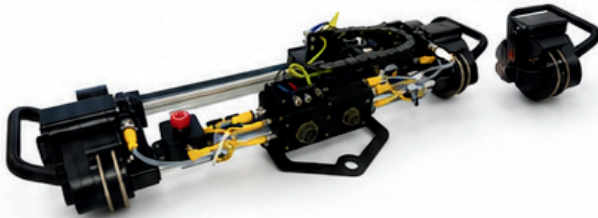

Map corrosion and thickness loss across tanks, vessels, and piping.

Apex

Modular corrosion mapping platform

- Modular universal scanner platform
- Supports weld, corrosion, tank, and B-scan applications
- Tool-free adjustments for fast setup

XR Spider

Automated raster corrosion mapping

- Automated corrosion and thickness mapping
- High-coverage raster scanning workflow
- Magnetic drive for secure scanning

Vertex

Two-axis pipe corrosion scanner

- Modular two-axis pipe scanner
- Designed for precise, repeatable inspections
- Supports corrosion mapping configurations

CLIX-CM

Chain scanner for corrosion mapping

- Chain-based corrosion mapping configuration
- Supports circumferential pipe scanning
- Modular design for different pipe diameters

DIGITAL RADIOGRAPHY

Support pipe weld radiography with a chain-mounted DR configuration.

CLIX-RT

Digital radiography
chain configuration

- ▶ Digital radiography configuration for pipe weld inspection
- ▶ Supports DR panel positioning on pipe
- ▶ Modular chain platform for repeatable setup
- ▶ E-stop equipped field configuration

PRIMARY SCANNER FOR DIGITAL RADIOGRAPHY

CLIX-RT is the digital radiography configuration in the CLIX chain scanner platform.

TANK INSPECTION & ULTRASONIC B-SCAN

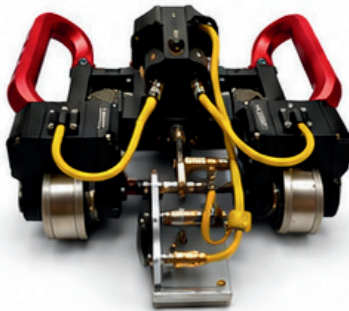

Scanner options for tank inspection, wall thickness, confined access workflows, and encoded B-scan inspection.

X3 SPIDER

Tank and inline B-scan scanner

- Versatile ultrasonic inline B-scan scanner
- Engineered for tough inspections and mobility
- Strong traction and obstacle handling

AXIS

Small-radius B-scan scanner

- Lightweight scanner for small radius surfaces
- Supports B-scan inspection on vessels, rolls, and piping
- Compact design for easier handling

APEX

Modular tank and B-scan platform

- Modular universal scanner platform
- Supports weld, corrosion, tank, and B-scan applications
- Tool-free adjustments for fast setup

H3 MANUAL SCANNER

Manual thickness and corrosion scanner

- Compact manual ultrasonic scanner
- Designed for corrosion mapping and thickness inspection
- Sealed encoder design for reliable data

CONTROLLERS & FIELD COMPONENTS

Supporting components that complete field-ready ScanTech inspection systems.

XtenDR

DR support accessory

Batt Pack

Portable field power
and control option

STC X Controller

Integrated scanner
control platform

WS3 Couplant System

Couplant delivery system

Joystick X-Series

Ergonomic scanner
steering control

BPS System Power Pack

Portable system
power pack

SUPPORT SYSTEMS & CONTACT

Couplant delivery, portable power, and system support for field-ready inspection.

WS3 Couplant System

High-efficiency couplant delivery for ultrasonic automation.

- ▶ High-pressure compact pump
- ▶ Portable field-ready setup
- ▶ Supports reliable ultrasonic workflows

BPS System Power Pack

Portable power supply for scanners and controllers in the field.

- ▶ Portable system power
- ▶ Rugged field case
- ▶ Supports remote inspection workflows

ADDITIONAL SYSTEM COMPONENTS

XtenDR

Batt Pack

STC X Controller

Joystick X-Series
