

About Us

Clean Combustion, Inc. specializes in pipeline services including flaring, filtration, separation, and heated commissioning. We are focused on providing the best level of service to our customers through preparation, communication, execution, and continuous improvement. We are a specialty services company that offers superior equipment along with proven and experienced personnel. We are focused on providing the best level of service to our customers through preparation, communication, execution and continuous improvement. We take a personal approach to every project and care for it as if our livelihood depends on it – because it does.

Personnel

Our personnel work with customers to plan, execute, and follow up on projects to ensure that we maintain the safest and most efficient service offering on the market. Our field supervisors average experience is 12 years, and they are backed by a management team with more than 85 years combined experience in pipeline services.

Safety / Quality

Safety is a core value for CCI. We know that when a customer hires us, we become an extension of their company, and want to extend their safety culture into ours. We use many tools to help ensure that our projects are completed safely from start to finish. We are proud of our record, and constantly work to keep it up.
