Building the Gulf Coast for Over 30+ Years

Marine & Subsea Capabilities – G&G Marine

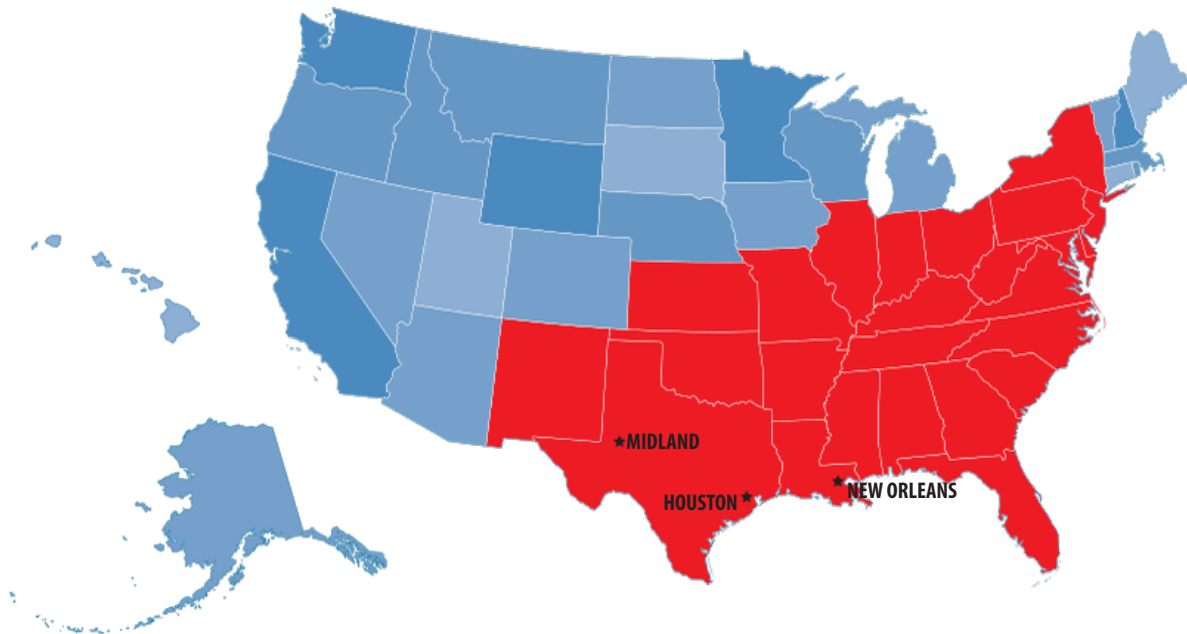

As part of the DEAN family, G&G Marine expands our services below the surface — providing subsequent and marine capabilities for utility infrastructure.

- Underwater inspections (Level 2 & 3)
- Structural repairs for docks, piles, and caissons
- Debris removal for utility facilities
- Marine logistics & barge operations
- Cathodic protection installation & inspection

Together, DEAN and G&G Marine provide integrated support — from shore to seabed.

DEAN AREAS OF SERVICE

SAFE LIVES MATTER. Dean emphasizes the responsibility of each employee for their own safety as well as the safety of everyone around them. These responsibilities are reinforced through Dean's Policies, Procedures, trainings, operator qualifications, hazard hunts, tool box talks, JSA's and behavior-based observations.
