OUR SERVICES

The DigiCal caliper tool from Winterhawk provides reliable visibility into pipeline geometry to support informed integrity decisions. Available in sizes from 4" to 42" and configurable for dual-diameter pipelines, DigiCal is designed to adapt to a wide range of operating conditions.

01

Geometry Profile

Provides a full geometrical survey on your line section(s). Preliminary report delivered within 24-hours and final within 2-weeks.

02

Debris Measurement & Mapping

The DMM reporting will call out the debris height along with the span of debris locations throughout the line section. Preliminary report delivered within 24-hours and final within 2-weeks.

03

Go/No-Go

Provides a detailed report with the minimum cross sectional diameter of the features and anomalies throughout the line section. Preliminary report delivered within 24-hours and final within 2-weeks.

PIPELINE SERVICES LLC.

ABOUT US

We Help You Catch Pipeline Problems Early, So You Can Save Time, Money, and Headaches Down the Road.

Keeping a close eye on the condition of your pipes is essential to maintaining a smooth-running operation. That's why we developed the Digi-Cal pipeline inspection tool. This easy-to-use tool helps you quickly assess the condition of your pipes, identify any potential problems, and take action to prevent costly repairs down the road.

BENEFITS

- Can pass bends of 1.5D, Back-to-Back, and S-Configuration
- API 1163 Compliant
- Customizable with alternate durometer and custom colored urethane, magnets, or anything else the job calls for
- Capability for fast reporting turnarounds
- Data Analyst Team with extensive ILI experience

Your lines are your livelihood. To keep them performing optimally, Winterhawk designs the most advanced inspection tools. Benefits from real-time diagnostics that break down every feature of your pipeline.
