

READY TO SERVE

Dan-Loc is a manufacturer and supplier of threaded products, fasteners, and precision machined components. With an extensive inventory of raw materials and full-line machine shop capabilities, Dan-Loc is fully capable and ready to produce any of your standard or special product requirements. We are equipped for heat treating to ASTM requirements and provide in house coatings to meet customer design specifications.

Dan-Loc coats teflon/Xylan PTFE fluorocarbon in house. We offer cadmium or zinc electroplating plus other specialty coatings, protecting our products from conditions and environments that corrode unprotected bolts.

We have a full range of widely used bolts ready for immediate shipment. We can also provide studs made from exotic alloys – plus other unique products. And we offer fast turnaround on special orders, including special length studs and custom configurations.

Dan-Loc has top of the line CNC machine tools. The shop is staffed with highly qualified and experienced machinists as well as the personnel and equipment to provide extensive quality control.

Our dedicated staff of fastener experts will make sure your needs are quickly met from our wide selection of material options including: B7, B7M, L7, L7M, B16, B8, B8M and exotic alloys.
