

Do you have a natural gas contingency plan for every what if? Mobile Energy Solutions has answers.

Many of America's industries depend on natural gas for productivity and more. But when an outage occurs, many are unprepared for the often devastating losses in production and profit.

Ask yourself:

Is my business prepared for

- > interruption in natural gas supply service?
- > planned pipeline outages?
- > emergency outages?
- > curtailment during peak demand?
- > the need to operate without access to pipeline infrastructure?

Mobile Energy Solutions delivers natural gas safely and reliably, anytime, anywhere. We are a turnkey provider of both LNG and CNG natural gas services anywhere in the United States.

When losing natural gas is not an option.

Your business runs on natural gas. And losing access to natural gas means losing productivity and profits. That's not an option. That's why Mobile Energy Solutions delivers supplemental or primary natural gas to help solve many challenges for many business types:

City Gates

Industrials

Commercial Operations

Off-Pipeline

We are safety conscious

While Mobile Energy Solutions provides a stable natural gas supply you can rely on, safety is our priority. We use equipment that is designed and engineered from the ground up to serve your critical needs. We also employ highly-trained personnel who follow the natural gas industry's fieldwork processes and who have broad project experience covering C&I, manufacturing, utilities, municipalities, transmission pipelines and institutions. Our teams and equipment are certified to meet the strict requirements of the U.S. Department of Transportation.

Delivering the Pipeline Experience™

With hassle-free services that are centered around your business and its success, we provide customers with competitive natural gas supply. That's why Mobile Energy Solutions is the preferred supplier of every major pipeline company in the US.

We are built to answer your what-ifs.

What if there is a planned integrity test?

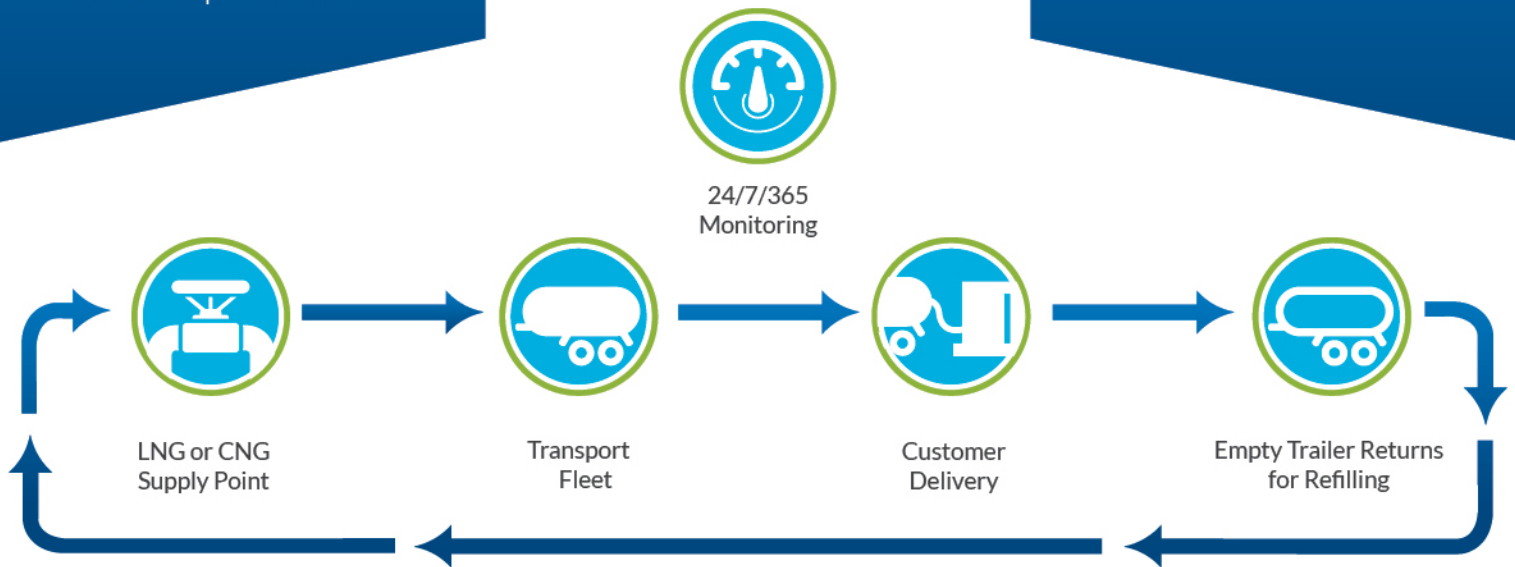

If your pipeline is taken offline due to planned maintenance, our mobile natural gas equipment can be on-site to supplement your supply with zero loss in production.

What if I don't have access to a pipeline?

Our equipment delivers the pipeline experience by constantly rotating to resupply you for any extended period of time so you can operate with complete autonomy.

What if my supply gets curtailed due to peak loads?

This is a common occurrence that can happen anytime. Our equipment can be on-site to provide the additional gas needed to keep you running at 100%.

And we're well equipped to do it.

CNG

Mini-trailers

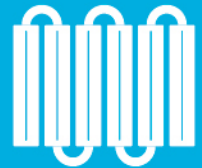

Tube Trailers

LNG

LNG Tankers

LNG Vaporizer
