

Optimizing Energy's Infrastructure
One Team, One Mission

SAFETY FIRST, SAFETY ALWAYS!

SERVICES OVERVIEW

DEAN was founded in Louisiana by Mr. Troy Williams in 1992 with the purchase of two cranes, which he subsequently leased to a local contractor. Since that time, the Company has grown into a leading, Tier 1 provider of midstream pipeline integrity services to some of the largest oil and gas pipeline operators in the U.S.

The acquisitions of G&G Marine and Coastline added complementary services and enabled the Company to offer complete pipeline integrity projects with limited, subcontracting requirements. While Dean and both acquired companies are separate legal entities, the acquired companies effectively operate as wholly owned subsidiaries of Dean.

Pipeline Construction, Repair, Maintenance and Integrity

All stages of project work from planning, procurement, scheduling, execution and oversight.

- New Pipeline installation up to 24" and up to 20 miles depending on conditions

SAFETY OVERVIEW

At Dean, our **number one objective** is the safe operations of all our people and equipment. We strive every day to meet the excellence that comes with being recognized as one of the nation's top high consequence area contractors in the industry. To meet this objective, we focus on the elimination of unsafe work practices and conditions through prevention and correction.

SAFE LIVES MATTER. Dean emphasizes the responsibility of each employee for their own safety as well as the safety of everyone around them. These responsibilities are reinforced through Dean's Policies, Procedures, trainings, operator qualifications, hazard hunts, tool box talks, JSA's and behavior-based observations.
