

PIPELINE INSPECTION SERVICES

PROTECT PEOPLE AND PLANET

WHAT DRIVES 3P?

For over 30 years, 3P Services has been driven by the idea that we must Protect People and Planet. This is what continues to drive our success today. Our In-Line Inspection services are designed and engineered to ensure the safety and protection of our planet and its inhabitants.

Our general inspection concept is to adapt our inspection tools to the pipeline's existing configuration rather than insisting on pipeline modifications until standard ILI equipment can be applied, which generally leads to solutions that are more cost effective for the client, where challenging pipelines exist.

The primary motive of 3P shareholders is sustainability. In 30+ years we have not changed ownership, which guarantees you continuity of service and no business disruption. We are a young company with incredible diversity and recognize this contributes to our innovative approach to customer solutions. Our aim is to serve our clients for another 30 years by focusing on protecting people and the planet.

ENHANCED CUSTOMER SERVICES

- Combined data analysis by ANSI-ASNT-ILI-PQ qualified data analysts
- Multiple run comparison
- R&D projects together with industrial partners
- We pay attention to your wishes and requirements
- Enhanced interaction guarantees a direct and continuous flow of information

QHSE

- Continuous improvement in qualification and certification
- Excellent industrial safety management

PERFORMANCE

- High first run success rate
- Comprehensive experience in challenging media
- Targeted solutions for
 - Heavy wall
 - Single access/BIDI
 - UHR NEO
 - TRIAX 3D MFL
 - Small diameter, MFL from 2"
 - Multi diameter
 - High temperature
 - High & low flow/pressure
 - Mitered or short radius bends (1.5D – or less)
 - Back-to-back bends
 - Un-barred tees
 - No pig traps installed
 - Reduced bore valves
 - Internal liner or repair layer
 - Negotiation of wye-pieces
 - And many more...

TECHNOLOGIES

Our fleet which includes 400+ live ILI tools, ranging in diameter from 2" to 48", is deeply modular.

3P is specialized in providing state-of-the-art inline inspection of pipelines and other structures transporting and storing hydrocarbons.

Operators are confronted by a large variety of threats to the integrity and safety of their pipelines and installations.

With our sensor technologies we have reliable solutions to identify defects.

- MFL (Magnetic Flux Leakage)
- UT (Ultrasonic)
- GEO and GEO+ (Geometric)
- XYZ (Inertial Mapping)
- DMR (Direct Magnetic Response)
- SRD (Short Range Distance)
- NEO

CASE STUDIES

Stay up-to-date and learn more about 3P's pipeline inspection projects. Our case studies show the close interaction of technology, know-how and experience to keep the operation of pipelines safe and clean, whatever the challenge. The close coordination with our customers on the approach is an important basis for our success.
