

Runaway Pigs Causing Problems?

PipeTrack: Real-Time Location, No Off-Roading

Whether they speed up, slow down, or stall altogether, keeping accurate track can be a labor-intensive nightmare.

By analyzing the pressure pulses created as the pig moves along the pipeline, we work out the pig's location — without AGM's, acoustic monitoring or crossed fingers — saving you time, risk and money.

Reliable Real Time Location & Speed? PipeTrack is Common Sense*

*No fine print here — just reliable location without sending out the search party.

Common Sense

Simple deployment, real time tracking, dashboard visualization with pigging speed.

Pressure sensor systems every 20 — 30 miles

Can do one pig run in a single installation with no need to move

Reading actual pig motions compared to spot readings which can get missed

Understand average pigging speed which gives you better control

Know where your pig is, even if it does get stuck

Here's how:

Simple To Install

Pressure connections made in seconds to available NPT taps

No Interruptions

Can be installed whilst your pipeline is operating

Robust & Reliable

Field proven industrial hardware with Starlink comms

Remote Location Ready

Flexible low power requirement makes for easy deployment

Real Time Interface

Simple to read interface with updated pig location and speed

Operator Focused Approach

Giving you accurate real time information for better outcomes

Here's why:

Ultra-High-Frequency Precision

Captures 1,000 pressure readings per second from your pipeline so pressure pulses are captured accurately

Advanced Data Analysis

Using our advanced signal processing so pressure pulses from the pig are accurately matched allowing for accurate location

State-of-the-Art Edge-Computing

Born from our real-time leak detection technology, field hardened – our state-of-the-art hardware ensures reliable results every time

Field Proven Methodology

Highly experienced team both in the office and in the field delivers reliable repeatable results even in the most challenging situations

Relentless | Innovate | Straight talk | Everyone united
