YOUR TRUSTED PARTNER FOR NITROGEN SOLUTIONS. ... WHEREVER YOU NEED US, WE'LL BE THERE!

Equipment Landscape

Direct fire units are efficient and a performance leader in the industry. It allows for the maximum heating of nitrogen utilizing an open flame at the rates listed below.

1MM Unit

Pressures	Designed for Max 10,000 psig with electronic over pressure shutdown
Flow Rates	Max 1,000,000 scfh (Range 350 – 16,500 scfm)
Temperatures	Maximum 500° F (@ 3,000 scfm or 180,000 scfh)
N2 Storage Capacity	3,000 & 2,000 Gallon tank options

740K Unit

Pressures	Designed for Max 10,000 psig with electronic over pressure shutdown
Flow Rates	Max 740,000 scfh (Range 250 – 12,000 scfm)
Temperatures	Maximum 500° F (@ 3,000 scfm or 180,000 scfh)
N2 Storage Capacity	3,000 Gallon tank per pump

Heat recovery utilizes exhaust supplied from the engine to provide the heat needed to vaporize the nitrogen. There is no open flame, safeguarding a safe working environment.

180K Unit

Pressures	Designed for Max 10,000 psig with electronic over pressure shutdown
Flow Rates	Max 180,000 scfh
Temperatures	Maximum 200° F
N2 Storage Capacity	2,000 Gallon tank per pump

Transport Support / Bulk Storage

Mini	4,200 Gallon
Transport	7,000 Gallon
Storage	10,000 Gallon
Queen	16,000 Gallon
King	22,000 Gallon

How does N2 Solutions ensure a safe and on-time delivery?

A single point of contact, coordinating from beginning to end, allows us to execute projects safely and in a timely manner. Our journey management, pre-job paperwork and GPS tracking system ensures our team can securely perform each job by giving them the tools needed to be successful. An open line of communication with our clients gives them peace of mind that N2 Solutions will meet and exceed their expectations.

Value-added Products and Services

N2 Solutions provides highly trained personnel, equipment, and products for all your pigging propelled with nitrogen needs whether it is offline mechanical cleaning, decommissioning, de-inventory, smart pigging, gauge plate runs, inerting, purging pneumatic testing, or abandonment.

N2 Solutions has nearly three decades of experience selecting the right pig for the job. We also have thousands of miles of tracking experience, using state-of-the-art electronic and acoustical equipment. For your next pigging operation, allow us to show you that pigging can take place in a perfect world.

N2 Solutions represents various manufacturers of pigs, pig tracking, chemicals, and other pigging or pipeline-related products which can be provided with or without our main services for even the toughest applications.

Tube Trailer Rental of Compressed Gas Nitrogen

- Capacity: 140,000 ^{www}scf (compressed gas)
- Pressure: up to 2,800 psi
- Height: 8'6"
- Length: 45'
- Width: 8'6"
- Weight: 68,000 ^{www}lbs

Pipeline Chemical Solutions - PCS Products

PCS Products: PFS is the exclusive dealer of Pipeline Chemical Solutions products.

PCS specializes in pipeline chemical cleaning products, pigging procedures, and other commodities for the pipeline industry.

PCS = Proven chemicals that save you time and money!

N2 Nitrogen Services DOES NOT perform chemical cleaning, injection or any onsite chemical cleaning services but we may recommend someone who does depending on the scope and location of work.

Pigging Systems

Pipeline Pig's

Steel Mandrel Pigs: Available in various configurations, with unique accessories and part configurations designed for your specific application.

Poly Foam Pigs & Drying Swabs: Large selection of poly foam pigs and drying swabs manufactured using the highest quality open cell polyurethane foam in many styles and densities for a variety of applications.

Pipeline Spheres: Available in poly foam or urethane, solid or inflatable styles.

Urethane Pigs: Cast urethane pigs include various solid-cast styles, with unique accessories and configurations designed for a variety of applications.

Custom Pig Configurations: Our experienced manufacturers and team of experts can design a pig specific to your project needs.

Pig Tracking Equipment

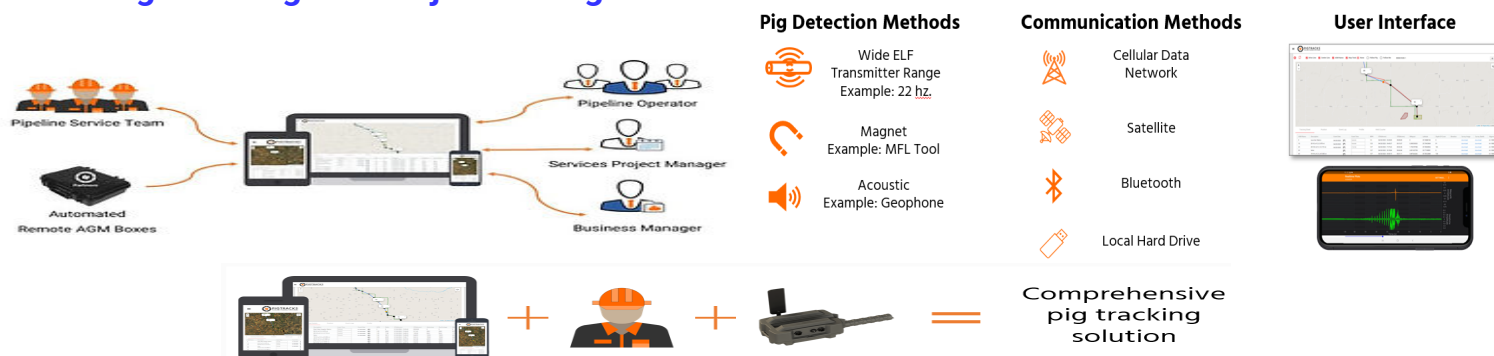

Electronic Tracking: Available in various models, brands and options designed to detect various transmitter frequencies or magnets. Also allows tracking of numerous pigs with various transmitter frequencies to detect certain pig's setup with each of the various frequencies. Visual, text and email pig passage indication options are also available.

Acoustical Tracking: Available in various models and brands, both wired and wireless options designed to easily set up and hear the passage of a pig in buried pipelines. Headphones, line-in vehicle or Bluetooth options are also available.

Transmitters: Available in various models, brands and options designed to emit an industry-standard 22Hz or user-adjustable electromagnetic frequency. Dip switch or wireless adjustable pulse patterns to provide a distinctive pattern and to conserve battery power options available.

Real-time Pig Tracking and Project Management

PigTracks Pipeline Piggig Platform: A real-time pig tracking and project management platform for your whole team. Know where your pig is at from home, office or field. PigTracks offers a full suite of solutions for survey, pig tracking, and project management.

Modern AGM boxes communicate with PigTracks in real-time to automate part or all of the tracking process. Tracking technicians can also enter passages. All the data is displayed on one screen so your whole team is aligned.
