

ILI PIG Cleaning Services

PARTNERING FOR THE FUTURE

For over 30 years we've brought a level of professionalism to each project. Our personnel have been successful in a variety of industries and positions that will bring a 360-degree perspective to a project that will aid in providing an economical, compliant, and practical solution to a successful completion.

CLEANING OF IN LINE INSPECTION PIPELINE INTEGRITY GAUGES

When it comes to the cleaning of In-Line Inspection Pipeline Integrity Gauges (ILI PIGs or "intelligent" PIGs), USFS has a solid track record spanning over eight years. We have honed our skills to offer a level of confidence and competence that sets us apart in the field. Our core commitment is to ensure the longevity and efficiency of your PIGs.

At USFS, safety is also our top priority. Our team of skilled technicians employs state-of-the-art tools and adheres to the strictest safety protocols. USFS is licensed to perform NORM or Naturally Occurring Radioactive Material decontamination and NORM survey services. Our crews are trained and certified in the safety and handling of NORM contaminated equipment and NORM waste. Our NORM decontamination crews consist of an RSO (Radiation Safety Officer) and a cleaning technician.

What truly defines USFS is our unwavering dedication to customer service. We understand the critical role these devices play in maintaining the integrity of your pipelines. Our approach is customer-centric, ensuring that you receive the highest level of service, tailored to your specific needs. When you choose USFS, you're not just getting a cleaning service – you're partnering with a team of experts who are deeply committed to your success and the safety of your pipeline infrastructure. Our customers trust us to deliver excellence.
