

# ENVIRONMENTAL SERVICES

SUPPORTING ENVIRONMENTAL SERVICES PROJECTS  
SAFELY, ON-TIME AND ON-BUDGET

PARTNERING FOR THE FUTURE

USFS is made up of seasoned environmental and business professionals who want to provide exceptional services to our business partners, therefore we established the tag line of “PARTNERING FOR THE FUTURE”. We want to bring a level of professionalism to the project that will be recognized by the client and will continue to provide opportunities to collaborate. Our personnel have been successful in a variety of industries and positions that will bring a 360-degree perspective to a project that will aid in providing an economical, compliant, and practical solution to a successful completion for all parties. USFS’ behavior-based safety programs meet the requirements of industrial/manufacturing facilities as well as contractor safety clearinghouses.

## ENVIRONMENTAL SERVICES

Our environmental remediation services are available to assist you when industrial accidents, fuel spills and environmental hazards occur.

### Site Decontamination and Remediation

We provide a range of soil and bio-remediation services including heavy metals stabilization, onsite thermal treatment, in situ remediation, and more.

### In Situ Remediation

We have the resources and capabilities to perform remediation services directly onsite without excavating soil contaminants or disturbing the soil structure. Our in situ remediations services include petroleum hydrocarbon bio-remediation, natural attenuation and soil augmentation.

### Decontamination/Decommissioning

Our team can provide decontamination and demolition services for manufacturing plants, tanks and other structures.

### Tank Cleaning, Repair and Maintenance

Our team can provide storage tank cleaning, removal of groundwater via pump and treat systems. Contaminated waste materials are safely disposed of off-site. \* NORM Licensed: Texas and Louisiana

### Waste Management

Our team can help create custom waste tanks management programs at both the enterprise and facility level to help reduce residual materials.

- Tanks
- Piping
- Soil Remediation

## INFRASTRUCTURE SERVICES

Our site development and industrial services are available to meet the needs of your commercial construction and utility installation projects.

---

### Site Construction

For construction or utility installation projects, we have the experience and excavating equipment needed to clear a site of all trees and vegetation and grade the site as needed.

### Transportation Services

Our Transportation division can simplify a project's transportation needs with trucks suitable for any type of hauling including oversize, heavy haul, long haul, bulk, and container transportation.

### Earth Work

We have the equipment to move and process large quantities of soil or rock to create the topography needed for your construction project.

### Demolition & Disposal

Our team can safely "self-perform" the demolition and disposal of medium to large old units, buildings, and concrete structures inside and outside of refineries, chemical industrial plants.

---

## OUR PROCESSES

For every engagement/project, we mobilize a specialized team of engineers, environmental specialists, compliance officers and project managers to evaluate the situation and create an individualized plan to ensure that your project is done efficiently, and cost effectively, but more importantly protects the environment and complies with federal and state laws. For large scale, multi-agency projects, we can work as extension of any team. Throughout the project, our team ensures that all actions taken are thoroughly documented and that the appropriate permits have been procured when needed. At the conclusion of a project, a final report is provided.

## OUR CLIENTS

At USFS, we work with the following organizations across the United States:

- Federal, State and Local Governments
- Environmental Agencies (e.g., EPA)
- Oil and Gas Companies
- Commercial and Industrial Facilities
- Engineering and Consulting Firms
- Military Installations
- Departments of Transportation
- Manufacturing Facilities
